

McArdle's Environmental Statement

At McArdle we strive to sustain our natural resources. Our commitment to continuous improvement in waste reduction and resource management is an integral part of our business operations. Our responsiveness to the environment has become the foundation for our corporate social responsibility policy.

In support of our commitment to the environment, we promote and practice our common goal by:

- Complying with existing industry, FSC CoC regulations
- Recycling 100% of paper and metal waste generated through production processes.
- Safely and efficiently handling production materials and finished goods
- Implementing the most up-to-date and technologically sound vehicles on delivery routes
- Exclusively using biodegradable, safe and certified soy inks
- Utilizing wind power as a high-efficiency and low-pollution source of energy
- Spreading environmental awareness to our employees to ensure impactful decisions
- Working to exceed the amount of waste recycled in 2016: 5.6 million pounds of paper and 30,000 pounds of metal plates
- Committed to meeting both SFI and FSC chain-of-custody standards

McArdle is determined to be a leader in the green movement. Therefore, we continue to monitor and renew the best processes of sustaining our environment through certified product use and smart recycling.

Sincerely,
